

March 27, 2018

Dear Dr. Levy,

I wanted to take a moment to let you know how much I am enjoying using the Max Scholar program with my students. Max Scholar has helped all of my students to decode so much better AND in a far more fun and interesting way than any other program or approach I used in the past. The stories in Max Reading are of high interest and help each student to become more independent as they are able to work the program by themselves. Of course, I am always, right there supervising them. Several students go on the program at home as well!

I know that I love the program, but I decided to ask some of my students what they HONESTLY think of Max Scholar. I told them to tell me what they REALLY think as their opinions matter very much.

So out of the "mouth of babes"...

Alexandrea- "I enjoy doing Max Scholar because it helps me with my reading and helps me with my vowel sounds. Sometimes I have to do something over again and I don't like that."

Justin- "I like Max Scholar because it is an educational website and because it is fun. I like the Max Reading. It helps me be a better reader."

Casey- "I like reading stories especially about the wolf and answering questions. I don't like the highlighting so much even though my teacher tells me that it does help me. Max Phonics helps me with my phonics- it helps me with blends."

Christopher- "I like Max Scholar because it helps me with reading. It also helps me to decode words. Some stories are interesting to read. My favorite story is the Ice Skating story. I try to go on Max Scholar on the week-end."

Yanelli- "I don't like the highlighting but I liked reading the story Art Class"

Chitra- "I don't like answering questions or doing the phonics. I do like reading the stories. My favorite story is Bow and Arrow."

Isabella- "Max Phonics helped my to decode words. In Max Reading I liked the short stories more than the long stories. Answering the questions was ok. My favorite story was The Best Baby Sitter".

I look forward to seeing you at the next Professional Development meeting.

Sincerely,

Shari Atlas
